

# The Training Resource Management System 5-min Guide

## What is a Training Resource Management System?

A software to optimize resource use and training budget for companies providing **Instructor-Led Training**

## It is not a Learning Management System

An LMS helps manage **e-learning** by enabling content management, course delivery, and progress tracking

**Training**  
Designed for training organizations

**Resource Management**  
Focused on back-office processes and administration

**System**  
An all-in-one software which integrates multiple processes

ILT represents 70% of training hours

56% of ILT modules are highly effective, 21% for eLearning

## Who uses it?

### USERS

HR directors, Training managers, Training administrators, Sales...

A back-office tool for **administrators**, not learners

### CONTEXT

**CORPORATE TRAINING DEPARTMENTS**  
To oversee employee training

**TRAINING COMPANIES**  
To manage the whole activity and increase profitability

**EXTENDED ENTERPRISE**  
To train external audiences (partners, clients and channels)

**CORPORATE UNIVERSITIES**  
To consolidate training practice within a corporate group

## What does it do?

### FEATURES
