

# Training Resource Management

A scheduling system to optimize instructor-led training operations (ILT & vILT) and maximize training budgets.

## CHALLENGE

Most companies have the best LMSs, but are managing Instructor-Led and Virtual Instructor-Led Training (ILT / vILT) with Excel spreadsheets and Outlook. With an average of 70% of training budgets invested in ILT and strong financial pressure, the need to optimize operating costs and “Train More with Less,” is real.

Training Orchestra’s solution provides a back-end Training Resource Management System designed to do just that—to reduce the costs of ILT and turn manual processes into automated workflows. How? By increasing resource use, optimizing session scheduling, tracking and controlling costs in real-time, and by making the most of time and resources. Organizations gain control over their training operations so they can focus on what matters most: learning and innovation.

Train more with less through cost-effective resource management

## BENEFITS

### Make the Most of Your Training Resources

- Optimize resource use & session scheduling:
- Identify best available trainers, rooms & materials
  - Manage end-to-end life cycle for each session
  - Graphical visibility of all resources

### Take Control of Your Training Budget

- Know what’s going on & make the most of your investments:
- Compute, consolidate & track all training costs in real time
  - Control & monitor your training investments
  - Forecast training needs

### Strengthen Operations & Team Collaboration

- Manage training as a project:
- Simplify & centralize communications
  - Collaborate on tasks & to-do lists
  - Track progress & milestones at-a-glance

### Get the Most From Your Data

- Drive detailed reporting & analytics:
- Get the right tools to visualize & interpret data
  - Leverage a centralized database with real-time KPIs
  - Easily drag-and-drop to create useful reports
